Flag: Follow up

Matt,

I reviewed the list of 85 Appendix B waters evaluated by ADEQ and provided to EPA. On the attached spreadsheet you will find my comments on each water in column AA. In some cases, I stated *no comment* which indicates that I have nothing to add to the ADEQ analysis based on the available information. Be aware that my comments are based primarily on a quick review of the spreadsheet information and available Google Earth imagery.

Let me know when you would like to discuss as a group.

Best,

Rob

Subject: ADEQ non WOTUS waters list

Hi Matt –

Per your request, please find attached our Appendix B list of 85 waters we evaluated and found to be potentially not WOTUS. I think the earlier list from my ppt contained only the lakes; this attached list also contains the streams and our comments/rationale for the evaluation, as well as the non-WOTUS category.

Glad to answer any questions you might have. Thanks for your review!

Patti
